ABOUT ME

As a Front-end Developer with nearly five years of experience, I specialize in HTML, CSS, JavaScript, Vue.js, Next.js, and Tailwind CSS. I build modern, scalable, and performance-focused web interfaces with a strong emphasis on user experience. My clean coding habits, attention to visual detail, and strong communication skills allow me to contribute effectively in team environments. Being part of innovative projects is important to me, as it helps me deepen my technical expertise while contributing to the overall success of the team.

WORK EXPERİENCE

FRONT-END DEVELOPER

Co-Influencer - Istanbul. - 2021-2022

- I led the development of a custom web application designed specifically for influencers, helping them enhance their audience engagement capabilities.
- I applied responsive design principles to ensure optimal functionality across various devices.

SOFTWARE DEVELOPER

GGMGastro - Hybrid - 2022-Present

- At GGMGastro, I contributed to the growth of a leading e-commerce platform in the restaurant equipment industry and helped improve the overall user experience.
- I collaborated closely with the DevOps team to lead the migration from Vue.js to Next.js, which significantly improved the platform's performance and user engagement.
- Working with an international team based in Germany enabled me to gain experience in global development standards and efficient cross-team coordination. This process strengthened my ability to quickly adapt to new technologies and maintain high code quality.

At GGMGastro, I contributed to the expansion and improvement of a leading e-commerce platform. By working with a Germany-based team, I gained insights into international development practices and broadened my global perspective. My role in the transition from Vue.js to Next.js demonstrated my adaptability and commitment to leveraging new technologies to deliver superior user experiences.

FRONT-END DEVELOPER

Stockimg AI - Remote - 2022-2025

- I developed and maintained client websites using modern design principles and a user-experience-focused approach.
- I collaborated effectively with cross-functional teams to integrate frontend designs with backend processes.
- Using React, Next.js, and Vue.js, I built high-performance, scalable, and maintainable solutions across various projects..
